

Custom Light Show

The Custom Light Show Sheet is for letting you pick the lights at your function. In some cases a client may not want to fill out the sheet or let me design a show for you. In some instances with your guidance I can fill in the blanks. The light show should enhance the event without being over the top for older people and people who strobe lights might effect. Light shows will always have some basic colored lights and some center piece fixtures as well. You can pick all sorts of lights from my web site. You can use 1 or 2 light stands or 10/15 feet of truss. Remember allow space for set up of these light supports. Pick 2—3 lights per stand or 6-8 lights for the truss. Have fun and call with any questions.
